TESTS AND TESTIMONIALS

on FOSTAC[®] Products

HARMONIZATION WITH FOSTAC® PRODUCTS

Nature shows us how electrical energy should work. We see this in the electromagnetic vertical flow of the earth. This energy supplies all life with the necessary information for perfect health. The DNA, which absorbs the information in every cell (works like a transmitter) and gives it back to the cells, is in resonance with this vertical flow. As long as this vertical flow can act on the DNA, the corresponding cells remain healthy.

Electromagnetic fields – both internal and external – disturb the vertical flow of energy on earth. Depending on the field intensity, the vertical current of the electric field lines is weakened or even eliminated. Where this vertical current is disturbed, gaps in the supply arise. The biological cells get into an information gap and can build up malfunctions. A large number of people are electro-sensitive, although to varying degrees.

Harmonization with FOSTAC® products starts by reversing the polarity of the fields of action of electrosmog, water veins and other influences to clockwise, which corresponds to the basic needs of the organisms of all living beings. Harmonization leads to vitality and thus enables a healthy life for humans, animals and plants. In the sense of a biologically positive climate that strengthens vitality and thus leads to health and joy of life.

By harmonisation we understand the integration of electromagnetic fields into the physical order of nature.

The FOSTAC® method and the effects and impacts described are not scientifically recognized. The technologies presented here (such as homeopathy, bioresonance and others) do not correspond to school science concepts and doctrine. Our products are not medical products and do not replace consultation with a doctor or alternative practitioner in the case of health problems. They are aids which create harmonization in the ethereal realm.

Photo: istock.com

Today modern quantum physics is able to confirm the secrets and teachings of the ancient mysteries by means of scientific insights, and even to prove their correctness. For example, the American biophysicist Gary Schwartz¹⁾ was able to demonstrate that feelings can be transmitted to other people over great distances and recognized in their electrocardiograms (ECG).

In these experiments, proof of this transmission was found not only in the ECG, but also in the electromagnetic waves of brain activity (electroencephalogram or EEG), which have an electromagnetic potential around one thousand times weaker than that of an ECG.

¹⁾ Gary Schwartz is a psychologist, author and professor at the University of Arizona and director of the Laboratory for Advances in Consciousness and Health. Schwartz researches the accuracy of media and energy healing.

DRINK, YOUNG BROTHER DRINK

The quality of water is to be massively improved with a simple glass fibre plate - experiment with tachyons, which make things flow.

»In my living room there has recently been a kind of cow trough, but it is people who come and go and drink here. Why do I bottle my neighbours? The reason is my magic tachyon-treated fibreglass plate, which has all kinds of advantages:

Water, which is only placed on it for five minutes, is said to be of much better quality and to have a positive effect on health.

Not only that! The platelet is supposed to erase pollutant information, make the taste softer and finer, increase the desire to drink more water and significantly increase the oscillating frequency of drinking water. I would like to believe all this, because I am open for miracles. However, there are slight doubts, and I think of the wonderful power of suggestion.

A quick try – and really, the water that was briefly on the platelet does indeed seem fresher and better to me. The other tastes chalky and bitter.

Do I fall for a few well-formulated words so quickly?

I invite some of the neighbours to test the water. Happy, drunk, enthusiastic and astonished, we discover that all the tests lead to the same result:

While the untreated water is described as stagnant, dull and dense, all the test persons in the chest tone proclaim that the «platelet water» is much fresher and lighter, reminding us of the freshness of a spring. One woman even compares it to an oyster, which is wonderfully delicious to sip.

I can do it any way I like, mix up glasses in a clever way or serve only untreated water several times: My test persons are not deceived and always recognize the treated water as the better one. I am disappointed by the clear statement of the experiment – I would have liked to question the whole thing a little.

My daughter says dryly: »Water remains water! It only becomes really clear when you see which of the water drinkers die first!« Well, I can take care of that in a couple of years. Also the propagated floral splendour is worth a try, which I will definitely test in spring. Will my coffee be healthier now?

WATER CRYSTALS

The FOSTAC company had water crystal images taken and compared water samples of treated and untreated water. The clearer the form and the more pronounced the structure, the higher the energetic state of the water should be.

In fact, water treated with tachyons shows the most beautiful crystal structures, while untreated water looks warped and cloak-like.

Once again I enjoy a glass of energized water, which now also makes my scepticism against studies flow. Water is a particularly good conductor, we know.

Hans Seelhofer, medial engineer and founder of FOSTAC, has developed a technology that has now been used

Photo: iStock.com

for more than twenty years for the purification of electrosmog, air and water harmonization. Tachyon energy is used to influence the direction of rotation of electrons, and interference fields can thus be harmonized.

It's a bit scary to me – the influence of mankind on the smallest spherical particles that can no longer be measured and that move faster than the speed of light. Tachyons are transition particles between different dimensions and types of matter, they could correspond to different forms of consciousness and could thus also be directed and programmed by thoughts. Our bodies would only have forgotten how to use this form of free energy. The extremely high positive frequencies with which the glass fibre platelet was treated should make it possible

to bundle energy and provide balance. The platelet can be used to harmonize drinking water, which has a positive effect on humans, animals and plants and promotes health. Do I ever try it with my quartz crystal?

No time to think about it, my bladder is tight – but my neighbour is already waiting in front of the toilet...«

WATER VITALIZATION

Crystal image analysis of drinking water with and without AQUAFLOW

Drinking water on first impression generally appears the same – and yet there are marked differences. Masaru Emoto (www.hado.net), a Japanese scientist, has picked up that thought and developed a method to show the quality of water in an impressive and self-evident way. He has published his conclusions in several documents.

In Switzerland this method of capturing picture images of water crystals is practiced by Ernst Braun and Sarah Steinmann (www.wasserkristall.ch). These pictures are produced as follows: From a sample bottle, 22 drops are applied individually to Petri dishes with a pipette and then frozen. Crystal-

line structures form on some of these frozen drops. These are photographed under a microscope.

In general it can be said that there are no identical images in the water crystal pictures as in the snowflakes and each sample is unique. It is also known that water normally produces hexagonal shapes during crystallization.

The clearer the form and more pronounced the structure, the higher the energetic state of the water.

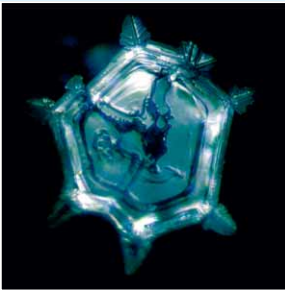

Die nachfolgenden Proben wurden von diesem Labor fotografiert.

HARMONIZING RADIO WAVE POLLUTION

Scientific proof on the FOSTAC CHIP (2005)

Coghill Laboratories in Gwent (GB) have examined the blood of a healthy 60-year-old man under various conditions to determine whether mobile phone radiation affects the living organism. This blood was tested in 10 different test series.

Group 1 (Control group): number of viable white blood corpuscles in the normal state.

Group 2: Number of viable white blood corpuscles after 8 hours radiation with a mobile phone without FOSTAC CHIP.

Group 3: Number of viable white blood corpuscles after 8 hours radiation with a mobile phone fitted with a FOSTAC CHIP.

Group 4: Number of viable white blood corpuscles after 8 hours radiation with a mobile phone without FOSTAC CHIP. During this test the blood samples were kept inside a metal box.

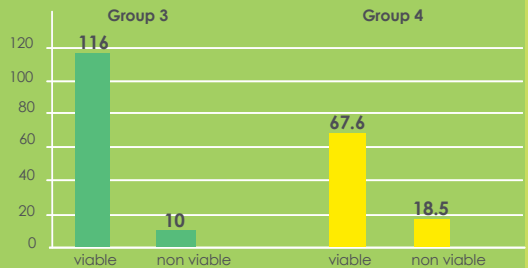

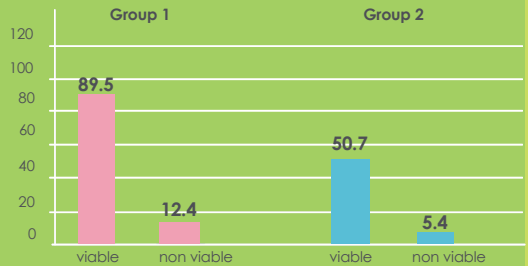

Test series	GROUP # 1 Control group		GROUP # 2 exposed		GROUP # 3 with FOSTAC CHIP		GROUP # 4 Sham-exposed	
	viable	non-viable	viable	non-viable	viable	non-viable	viable	non-viable
1	84	11	49	5	108	9	72	24
2	79	8	58	2	114	8	68	25
3	88	10	51	12	108	11	77	19
4	89	15	47	11	123	6	70	21
5	76	14	45	7	115	15	73	18
6	95	13	56	7	121	8	69	20
7	81	12	52	9	118	7	61	11
8	88	12	48	0	119	10	70	18
9	94	9	55	0	106	12	55	13
10	121	20	46	1	128	14	61	16
Average	89.5	12.4	50.7	5.4	116	10	67.6	18.5

Photo: pixabay.com

All test cycles clearly and indisputably prove that the FOSTAC CHIP harmonizes radio wave radiation completely. To the great astonishment of the scientists, the number of viable white blood cells even increased (group 3).

The original 28 page study of the Coghill Laboratories is available from us on request.

KINESIOLOGICAL BLIND TEST WITH THE FOSTAC CHIP

(Double-blind study with 48 volunteers, between 14 and 78 years, using 3 test series)

The kinesiological muscle test, if carried out correctly, provides information about whether a matter, substance, emotion, information etc. strengthens or weakens the organism to be tested.

The following summary shows a study with a total of 288 tests under the following conditions

- A) Blind test with iPhone, equipped **with two** FOSTAC CHIP crossed over each other
- B) Blind test with Samsung E2550 **without** FOSTAC CHIP
- C) Blind test with Samsung E2550, equipped **with one** FOSTAC CHIP

The tests took place in the *Praxis für Kinesiologie und Lebensberatung, 2502 Biel (CH)*, as simple blind tests.

The test person was unable to recognize whether the mobile phone was equipped with a chip or not. Each test was carried out twice, once on the right and once on the left arm (test A 96 times, test B 96 times, test C 96 times).

Karin Wyss
Praxis für Kinesiologie und Lebensberatung
2502 Biel

December 2010

SUMMARY:

- A) With all persons: Muscle on the right and left arm 48 times stronger.
Total 96 times strong - quota 100 %.
- B) 46 persons: Muscles on the right and left arm 46 times weak.
One person's left arm strong and right arm weak.
One person's right arm strong and left arm weak.
**Total 94 times weak
2 times unequal - rate: 98 %**
- C) 46 persons: Muscles on the right and left arm 46 times strong.
2 persons right and left unequal – an additional FOSTAC CHIP led to uniform strength.
**Total 94 times strong
2 times unequal - rate: 98 % or
100 % when using two FOSTAC CHIP**

CONCLUSION:

Out of 288 tests, 286 (99.3%) resp. 284 (98.6%) have clearly shown that even a mobile phone in stand-by mode without a FOSTAC CHIP has a negative effect on the muscle tension of a person. In contrary when using the FOSTAC CHIP the muscle tension in the human body reacts positively. From the point of view of muscle tension, the human body is thus returned to its ideal state (without a mobile phone and without technical sources of interference).

ENERGO-MEDICAL EXPERT OPINION ON THE MASTER CHIP

(Summary of a blind study with 20 test persons and 3 test series)

A scientific study with three test series, including

- **Meridian diagnostic** (Prognos®),
- **Segmental diagnostic** (Amsat-HC®)
- **Heart rate variability** (TimeWaver® Cardio),

shows the bio-energetic effects of the MASTER CHIP when exposed to a mobile phone call. .

Simple blind tests performed in June 2011 by Dr. med. Manfred Doepp, Holistic Center®, Prien (Germany).

The test person was not able to recognize whether the mobile phone was equipped with a chip or not. As test persons 20 persons of different gender and age were selected. They each used the mobile phone for 4 minutes in a real connection, whereby the call was not answered (ringing mode).

Criteria in %	without MASTER CHIP	with MASTER CHIP
Vital energy	- 12,2	+ 8,6
Harmony	- 14,7	+ 10,5
Organ function	- 11,2	+ 7,5
Conn.tissue density	- 5,7	+ 4
Tension/relaxation ratio	- 4,2	+ 3
Stress index	- 105	+ 132

Summary of the mean values for mobile radiation (all 3 procedures with 2 parameters each)

Dr. med. Manfred Doepp, Holistic Center®

The complete study can be requested from us.

SUMMARY:

The investigated MASTER CHIP effected an improvement in the energo-medical criteria of energy and information, which are significantly degraded by the electrosmog of mobile telephones. In statistical terms, the results are significant to highly significant. The criteria of vegetative balance and stress tolerance were influenced in the sense of neutralisation.

The MASTER CHIP has a similar effect in case of exposure to natural radioactivity.

Telephone conversations conducted with a mobile telephone without MASTER CHIP reduced organ functions and caused an increase in the viscosity of the active connective tissue or the matrix. With the MASTER CHIP (held in the user's hands) these biological effects were not only neutralized; they were converted into positive effects.

This means that positive bio-energo-informational effects can be attributed to the MASTER CHIP. It is suitable for neutralising or reharmonising the disharmony in the human body caused by electrosmog and mobile telephone radiation.

The MASTER CHIP (with two chips stuck together to boost effectiveness) is able to harmonize natural radioactivity at low dose levels, here in the sense of reducing the stimulating and stressful effects of pitchblende on the organism.

It can also positively influence radon and radium with regard to their exogenic effects (without incorporation).

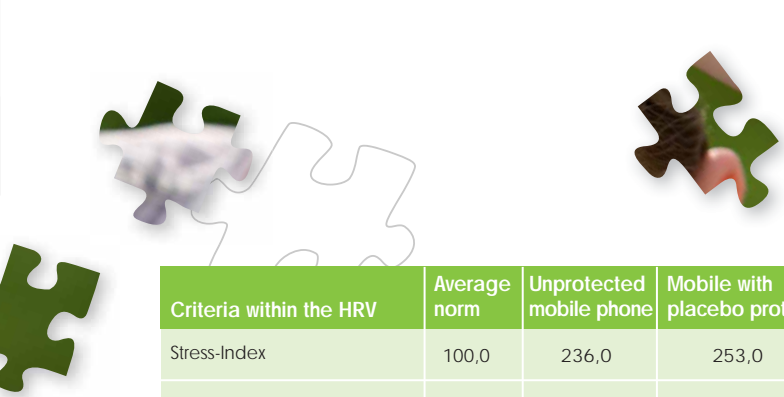

ENERGO-MEDICAL DOUBLE BLIND STUDY RHO STAB MINI

(Summary of a blind study with 20 test persons)

In a study with the HRV diagnostic procedure (measurement of the heart rate variability, via ECG), the effect of the **RHO ROD MINI** against an exposure to electrosmog (mobile phone radiation) was tested in 20 test persons of different genders and ages. The purpose was the clarification of six objectives:

1. Evaluation of the variation of the autonomic nervous system as the baseline for comparison of a later exposure to electrosmog
2. Evaluation of the autonomic nervous system in the case of an unprotected exposure to a mobile phone
3. Evaluation of the autonomic nervous system in the case of an exposure to a mobile phone **with the presence of a placebo RHO ROD MINI**
4. Evaluation of the autonomic nervous system in the case of an exposure to a mobile phone **with the presence of an informed RHO ROD MINI**
5. Comparison of the situation: placebo and informed RHO ROD MINI
6. Comparison of older and newer RHO-ROD-MINI

The tests were conducted at the Holistic Center in Prien (Germany), and the Integrated Medicine Practice in Herisau (Switzerland).

Criteria within the HRV	Average norm	Unprotected mobile phone	Mobile with placebo protect,	Mobile with verum protect.
Stress-Index	100,0	236,0	253,0	134,0
Distress-Index	7,5	104,0	174,0	12,0
Tension/relaxation ratio (VLF/HF)	2,0	4,1	5,6	2,2
Tension sum (VLF + LF)	70,0	78,0	75,0	68,0
Unconscious brain (Index of centralisation)	4,0	7,2	8,4	4,1

Note: The differences between placebo (not informed) and verum (informed) are **statistically significant**.

SUMMARY:

In this scientific, randomized, placebo-controlled double-blind study, there were significant results with respect to mobile phone calls on the one hand and also to the use of the **RHO ROD MINI** of the FOSTAC company, on the heart rate variability (HRV) and as a result also on the autonomic nervous system (ANS):

- Unprotected phone calls, as well as those protected with the placebo rod, stress the autonomous nervous system.

The researched **informed RHO ROD MINI produces an improvement of the medical criteria that are responsible for stress.**

- Phone calls with a mobile phone at one ear reduce the regulatory capacity of the autonomous nervous system in the sense of a tendency to numbness. **With the RHO ROD MINI**, these biological effects are not only neutralized, **but converted into positive effects.**
- As a result of the significance that results in this study, we can thus say that the **RHO ROD MINI has the capacity of protecting against technical electro-smog, as well as a biological-energetic-informational effect.**

Dr. med. Manfred Doepp, Holistic Center®

TESTIMONIALS

(Excerpt from our collection)

DOUBLE-LANTOS PYRAMID

»I have often noticed that the energetic stress in classrooms is in some cases enormously high. Some time ago I therefore installed a FOSTAC® DOUBLE LANTOS PYRAMID in three different classrooms. The feedback was very impressive:

- The students are calmer and more concentrated
- Better work is possible because the students are more interested
- Especially restless students (with ADS tendencies) reacted very positively
- The teacher felt more energetic after the lessons
- Some students who came to school after the weekend like «charged up» were already calmer after half a day of lessons

I can only recommend such or similar measures for every school building.«

Susan Lüthi ■ Aeschiried (Switzerland)

OCTARION

»In a metal construction company, whose neighbouring companies are also metal construction companies, the approx. 15 employees repeatedly experienced discomfort such as restlessness, stress, nervousness, palpitations, exhaustion, lack of concentration, weak legs or even emotional disharmonies. Apart from two water veins and earth radiation exposure, the greatest exposure was, however, external electromog, as there is a railway line nearby, a high-voltage line and three mobile phone antennas on the other side of the company. Conditions similar to those in a microwave oven.....

The OCTARION proved to be optimal for bringing the interference zones into harmony. The results showed very quickly: the legs were no longer weak, the heart-beat was gone, restlessness and feelings of stress calmed down. One employee (who brought a lot of negative energy into the team) quit three days later; the management found more energy to tackle a restructuring and was also able to hire more staff, as, among other things, they received more orders than in previous years. «

Mario Keller ■ Wil (Switzerland)

SANA LEA

»Various FOSTAC products had been placed in my flat for a long time. Through new buildings, line reinforcement of the railway line and mobile phone antennas at the neighbouring house, the energetic Situation got unbearable for me.

At a friend's house I learned to know the SANA LEA. I also ordered one in order to harmonize the radiation of the mobile phone antenna coming from my neighbouring house. I slept deeper and better again afterwards. I hung a second SANA LEA on the living room wall, in the direction of the train station.

But the disturbing influences from outside were so strong that I needed a third SANA LEA. I placed this one (together with the other two) in the shape of a triangle and

the effect was excellent. No more fight of the elements. I had the feeling that now the energy was flowing again as if the flat itself had a better grounding. I feel more peaceful, more balanced, my inner self is expanding elastically... Thank you so much!«

Helga Schott-Dietz ■ Dornach (Switzerland)

HARMONIZATION OF A SPA HOTEL

The owner of a spa hotel attached great importance to the fact that his hotel is free of pollution such as electrosmog from WLAN, radio telephones etc. and that his guests find peace and relaxation in the premises of the facility.

The topic of reducing environmentally harmful influences had always interested him and through a guest he learned about the solution systems from FOSTAC.

For some years now, all the rooms in his hotel have been completely harmonized. Since then he could make the following statement:

- The guests speak of a special atmosphere when they enter the house
- The AIRWELL, which is located in the wellness area, acts as an area of attraction where guests like to stay
- The employees have become more relaxed and efficient
- Overall, there is a good vibration throughout the house

The owner family itself was also faced with effects such as

- positive mood
- physical and mental well-being
- more restful sleep.

All family members could perceive this clearly.

FOSTAC H.O.M.E

»For some time now I have been the happy owner of a FOSTAC H.O.M.E DESIGN 72. Of course the decision as to whether this product would really bring about the desired effect, success and changes was a question of trust in FOSTAC. My absolute lack of understanding of the technology can only be compensated for by trust.

My trust has paid off. From the beginning I felt that something positive was happening, even if this feeling quickly led me to the thought »maybe you are just imagining it«. Yet, I could not express this diffuse feeling, nor could I trace it back to the H.O.M.E with any certainty, because everyone knows the fluctuations in their own emotional and physical sensations. It could just as well be a good phase that made me feel this way...

In the meantime, however, I can clearly say that I feel calmer, more balanced and emotionally stable inside. I sleep deeper and now wake up rested and happy. As soon as I enter my apartment, I feel a kind of protective shelter and I feel very comfortable. To perceive this state over such a long period of time cannot be a coincidence - so it must have something to do with the H.O.M.E after all.

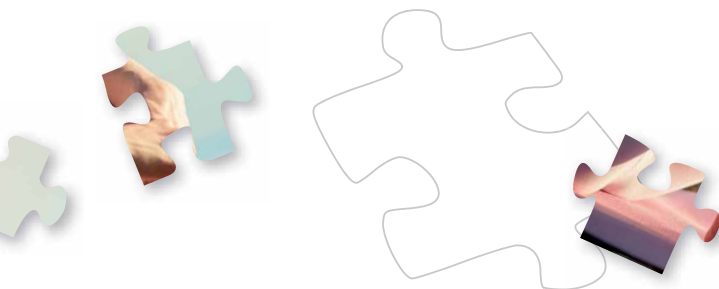

I am also very happy to hear from various friends and acquaintances again and again how homely it is at my place. Even if they cannot associate it with the H.O.M.E, I am convinced that it is the harmonization by the H.O.M.E that makes it so. My little Golden Retriever puppy also seems to feel the statements that it is so cosy and relaxing at my place, because his favourite place is right next to the FOSTAC H.O.M.E.

The soothing light of the H.O.M.E also creates a very special atmosphere.

It was worthwhile for me to trust the knowledge and experience of FOSTAC. Just the idea of being able to make a personal change to my living conditions made it easy for me to decide on this investment.»

Annegret ■ Neu-Ulm(Germany)

HOUSE HARMONIZATION

»A friend of mine lives in a small, bright green house. Unfortunately she didn't feel comfortable in it, she was often tired, didn't feel like working. Something was just not right.

Once we had identified all the factors, we started using BioPhoenix® products to harmonize. The result was really obvious. She suddenly felt powerful again, was able to do all her work again and was able to perform well again. In addition, she changed again into a more positive and creative person.«

Gabriela Bügler • Therapist • Nuolen (Switzerland)

»Our living spaces are harmonized with various products from FOSTAC. Since then we have practically never been sick again, the children are visibly less quarrelling and have developed very much to their advantage. I myself have become calmer and more satisfied.

I am enthusiastic about the new water quality thanks to water vitalization. The whole family drinks much more water. The taste is clearly different from conventional water.«

Yvonne Schöni • Kefikon (Switzerland)

»I had harmonized my company with FOSTAC products a few years ago. The immediate harmonising effects on electromog and the entire environment were so convincing that I decided to have my single-family home additionally harmonized some time later.

Since then, my family also feels much more at home. Only when something is no longer there does one notice that it was there at all.

I owe this peace and quiet, this new climate and this pleasant ambience to the technologies from FOSTAC. I am happy to vouch for this.«

Silvio Mattioli • Electrical Syst. • Flawil (Switzerland)

photo: istock.com

QUALITY OF SLEEP

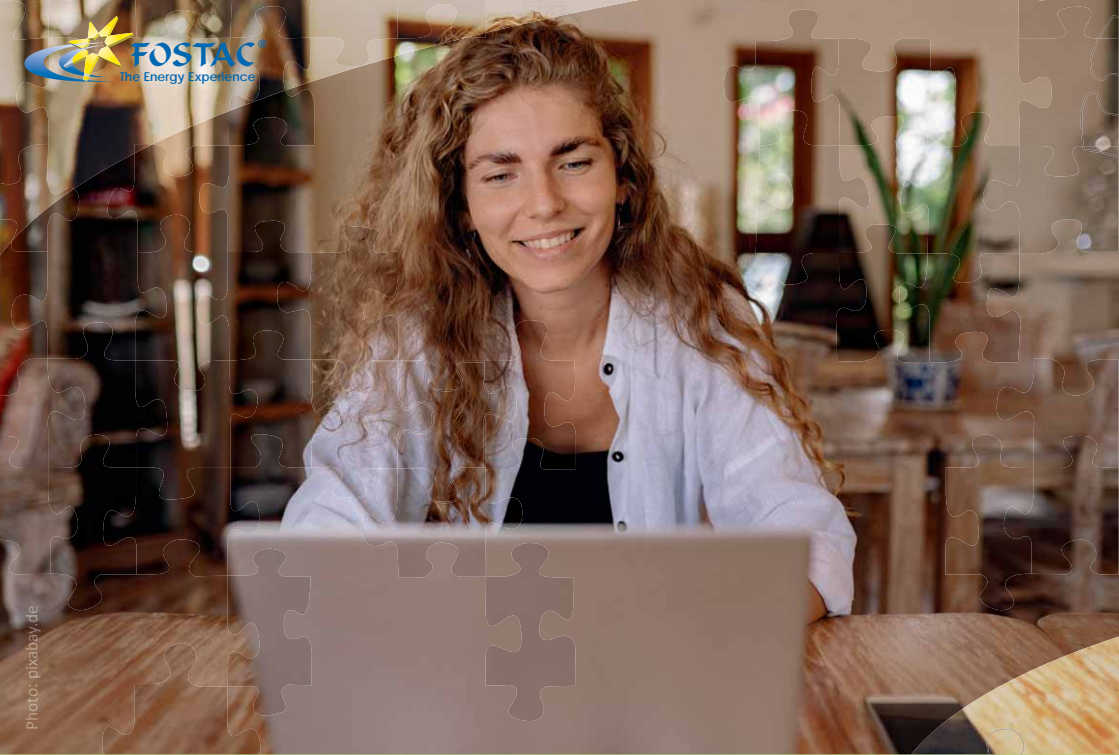

»Some time after I moved into an apartment building, I could no longer sleep properly and relaxed. In this apartment building, almost every one of the 8 parties probably has a WLAN. In addition, a double track railway line runs directly past the house.

The constant itching, tingling and muscle twitching when I was lying in bed made me very upset. My bedroom is located on the outside wall facing the railway line. As it was getting worse and worse I tried to sleep in the guest bed (located a bit further away from the railway line) and then in the living room. In the living room the symptoms were slightly better, but there was no question of a restful sleep.

So I asked my father for help. We placed a 125mm SPHERE from FOSTAC under the center of my bed, as well as 3 LANTOS PYRAMIDS in a triangle (one at each corner of the foot of the bed and one in the center of the headboard). We also placed a SANA LEA on the wall facing the railway line. Since that time I finally sleep well again and feel rested in the morning.«

Erik Frehner ■ Staad (Switzerland)

ELECTROSMOG AND ELECTROSENSITIVITY

»As a result of heavy metal poisoning I have unfortunately been very electro-sensitive for some time now. The lockdown in March 2020 and the associated fact that people in my neighbourhood increasingly worked in their home office had a very negative effect on my well-being. Sleeping in the air-raid shelter temporarily gave me some physical relief at night, but it was not a satisfactory solution at all. In addition, my granddaughter also had to work in our home office in the meantime and was online practically all day. A burden that I could hardly bear. I heard through a third person that the OCTARINO would have a very good

effect when exposed to electrosmog. Although I had no great hopes, I was willing to give it a try and ordered an OCTARINO from FOSTAC.

I felt the change from the very first moment we positioned it: I no longer had any complaints, my cardiovascular system remained stable, my nerves were no longer over-stimulated and I finally felt good again despite the increased exposure to electrosmog.

On the one hand I am amazed and on the other hand I am absolutely thrilled about the overwhelming success of this product and am happy to recommend it to others at any time.«

Priska Spengler ■ Unterstammheim (Switzerland)

»Due to my professional activities, I am very frequently on the road in my car and often have long telephone calls with customers, referring authorities and physicians. I use a smartphone and a «Plantronics Voyager» headset, which is connected via Bluetooth. This headset is currently one of the most powerful, equipped with «double microphone technology», which is particularly effective against ambient noise from outside.

The disadvantage of this is the «magnetic radiation» that is produced, which often leads to headaches during longer active use (telephone conversations).

Through a FOSTAC partner I had the opportunity to see for myself the effectiveness of the HEADSET CHIP in practical use.

I have to say clearly that the result convinced me very much, because the „headache symptoms“ have practically never occurred again since then.

Recently, I lost my headset with the HEADSET CHIP and had to buy the same model again; I used this one without the chip at first... Zack, immediately the phenomenon with headaches during phone calls again.

I bought a HEADSET CHIP again and indeed the headache phenomenon on the daily phone has been history ever since.

This product is highly recommended because its effectiveness is evident.«

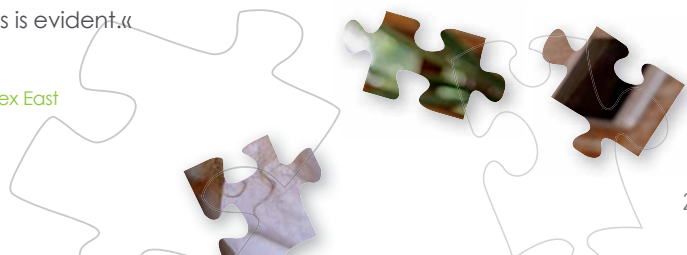

Ruedi Weber
Managing Director Psych Spitex East
Zuckenriet (Switzerland)

»One customer complained of constant headaches since he had been driving the new electric car. I advised him to put the RADISEE in the car and indeed the headaches were no longer an issue.

When his partner removed the RADISEE one evening without his knowledge and he got into the car the next morning, he said to her: »Something is different in this car«. She thought there was something wrong with the car and asked him what he meant by that. He explained that he felt different from the day before, when he was sitting in the car. Then she confessed to him that she had taken the RADISEE out and he demanded that it be put back in the car immediately. Since then he feels comfortable in his electric car again and has no more headaches while driving.«

Daisy Bruno ■ Rorbas (Switzerland)

ELECTROSMOG AND 5G

An excerpt from various customer responses to the OMNIUM pendant:

»Thank you very much for the OMNIUM pendant! I've been wearing it on my bra with a ribbon since it was released and I must say I've never had such a good product before. The permanent vibration of high frequency exposure in the aura is gone, I am relaxed inside, much calmer and have a better quality of life. There is a deep, ever-present, fine, joyful feeling inside myself that feels so beautiful. It is like a deep exhalation and relaxation after a long period of constant stress.«

»In the past I noticed a constant nervousness, as if I had drunk too much coffee. Since I started wearing the OMNIUM pendant, this feeling has completely disappeared.«

»With the OMNIUM I feel much calmer, at peace within myself, centered.«

»My nerves are more stable and I am much more resilient since wearing the OMNIUM.«

»A friend of mine, as well as myself, work in the city of Zurich – where 5G is already omnipresent. Since we started wearing the OMNIUM pendant we have been watching the hectic and nervousness in our surroundings like in a film. As if we were watching from the outside and found ourselves in a protected, peaceful field – which is probably true... When

I didn't wear the pendant on one day, I reacted emotionally to every little thing and was even surprised about my annoyed behaviour.«

»For about half a year I had massive sleep disturbances, I could hardly fall asleep and woke up constantly at night. Since I have the OMNIUM pendant on my bedside table, this problem has disappeared, I can finally sleep again!«

»Already a few months ago I noticed a kind of dazedness, sometimes even vertigo. It was difficult for me to concentrate – as if I had cotton wool in my head. Since I have been wearing the OMNIUM I am much clearer, my concentration is much better and the vertigo has disappeared.«

Photo: istock.com

»I would like to share my experience with the OMNIUM pendant with you.

Since I have been wearing the OMNIUM I feel centered, balanced and calmer. The OMNIUM has even passed the «IKEA test». Normally, I always felt very bad (tired, irritable, bad mood) after a visit to IKEA or other shopping centres. I went to IKEA shortly after I bought the OMNIUM and noticed that I felt exceptionally well in the evening. I went back to IKEA a month later and even after this visit I felt very good.

In the beginning I had worn the OMNIUM at night as well, but I didn't feel comfortable with a chain and pendant around my neck. So I tried to sleep without the OMNIUM, but the quality of sleep just wasn't good anymore. Finally I put

the OMNI-RA pyramid on the bedside table and since that moment my sleep is restful and deep again.

One of my clients had expressed similar positive experiences with the OMNIUM pendant.«

Susanne Aeberhard ■ Altnau (Switzerland)
