

ALPACA FLEECES

ALPACA FLEECES, energized with the FOSTAC® Technology, create a loving but powerful energy field, in which the child is enveloped. A feeling of protection and security arises. The chakras are kept open and the energy flow is stimulated, helping the child to fall asleep and to sleep right through the night. The beneficial energy flow can consolidate health and resistance to illness. The ability to learn and the general development in children can also be influenced in a positive way.

These ALPACA FLEECES are produced especially for FOSTAC® under Fair Trade conditions. They come from Peruvian highlands (Andes).

Care: Washable max. 1-2 times a year at 30° C (wool wash cycle); few wool detergent; blow dry.

Additional advantages and characteristics of ALPACA FLEECES:

- 100 % natural product (produced biologically)
- free of dust mites, as there is no interior moisture
- hypoallergenic (suitable for asthmatics/allergy sufferers)
- manufactured without chemical dye and bleach
- processed without the use of formaldehyde
- warm and cosy; breathable and lightweight
- non-flammable
- include natural fabrics that protect the wool from aging and from dirt
- contain neither oils (lanolin) nor animal fats (unlike sheep's wool)
- Fair trade production
