

ELECTRIC

The **ELECTRIC** plate is used primarily against the negative effects of the in-house electrosmog, such as the internal power network and all devices connected to it.

Special appliances such as induction cookers, water beds, etc. must be harmonized separately.

The optimal size of the plate (A6, A5 or A4) is preferably tested individually. The personal sensitivity of the user is decisive when selecting the product. Our consultants will be happy to assist you.

For high electromagnetic pollution or directional beam loads, we recommend the additional use of a SANA LEA OMNIGOLD or OCTARION/OCTARINO and for all wireless devices the FOSTAC OMNI CHIP or the ELECTRIC plate (Mini, A6 or A5).

The problem of microwave ovens remains even after the application of an ELECTRIC plate. The protein structures of food are being destroyed in microwave ovens. Microwaved food can cause health damage to the body.

Tip:

Induction cookers can also be harmonized with ELECTRIC plates. Usually the size A5 is needed.

TECHNICAL DETAILS

Material: Glass fiber fabric, laminated

Size: A4, A5 und A6
