

FOSTACARE NEPHRO

Keeping the kidneys healthy requires sufficient flushing with water.

FOSTACARE NEPHRO increases the flushing function of the kidneys and is a unique new development based on several special plant extracts.

Since only natural herbal ingredients are used, this product is also suitable for vegans without any restrictions.

Energized with the FOSTAC® Technology.

Recommended intake:

1 capsule per day with a little liquid at mealtimes.

Preferably in the morning, as increased flushing of the kidneys leads to an increased urge to urinate.

Ingredients: Dandelion special extract | Goldenrod special extract | Nettle special extract | Horsetail special extract
